About us

Everyone wants something easy, tasty, and fast... 20 years later, in 2005, we started producing frozen dough products, under the MOKA brand. We understood the market's need for affordable, quality products, and we came across confirmation for our efforts very quickly. In subsequent years, we have achieved very successful cooperation with all major retail chains, reached the outlets in every place in our country, and started to export abroad.

All processes take place under highly controlled conditions, on the most modern equipment, that enables constant improvement of capacity and quality.

MOKA company is focused on the constant development and improvement of its own brand and products under a private label.

We produce 4,000,000 kg of frozen dough per month and export our products to the Serbian, CEFTA, and EU markets.

MOKA has established an integrated management system certified according to the requirements of international standards:

IFS Food, Ecovadis, RFA, Vegan, RSPO.

Bake Off

The background of the slide features a close-up, high-angle shot of several golden-brown baked goods, likely croissants or pastries, stacked together. The lighting is warm, highlighting the texture and sheen of the crusts.

Our Bakeoff program is created for customers that demand premium quality, consistent results, and fast preparation.

Carefully developed, fermented, and deeply frozen immediately after production, our bakery products preserve their freshness, texture, and authentic taste until the moment they are baked.

Designed for hotels, cafés, restaurants, bakeries, and retail chains, our products are easy to prepare and ready in approximately 15 minutes, delivering the aroma and appearance of freshly baked pastries straight from the oven.

Using high-quality ingredients and modern production technology, we offer a wide range of frozen bakery solutions including croissants, pastries, and specialty bakery products.

Every product is produced under strictly controlled conditions to ensure reliability, uniform quality, and excellent performance in every bake.

Our goal is to provide practical and efficient bakery solutions without compromising taste or quality - helping professionals serve fresh, warm, and visually appealing products with minimal preparation time.

MOKA

CROISSANT WITH SESAME 70g

Quick-frozen unbaked
yeast puff pastry product

BAKE ON
T = 180 °C
15 min
